

STANDARD RANGE

ALUMINIUM DRIVEWAY GATES

CELESTE

The Celeste is a semi-private design with vertical infill panels and open bars at centre of each leaf in a curve design.

Part of our standard range of aluminium gates, the Celeste is a stunning semi-private design with open bars at the centre of each leaf flanked by vertical infill panels. This design is completed with rising curved top.

As part of the standard range you have a choice of 4 woodgrain finishes and 6 standard RAL colours, with any other RAL colour available on request.

A perfect option for manual gates, the profiles can also be reinforced for gate automation.

Available as a single leaf gate up to 2500mm, a set of double driveway gates up to 5000mm or a sliding gate up to 5000mm, with each design manufactured up to 2400mm high.

The curved top on this gate rises 200mm from post to centre, so a 1600mm gate would rise to 1800mm.

The infill boards on this gate have the option of 100mm, 200mm and 300mm widths with vertical, horizontal and diagonal infills available.

We are able to supply a wide range of manual hardware, gate

automation, access control and intercom systems for each project so be sure to let us know if you have any specific requirements.

SPECIFICATION

Width	Swing up to 5000mm Sliding up to 5000mm Ped/Side up to 2500mm
Height	Up to 2400mm

Additional Extras

Access Control

There are a number of additional gate hardware and access control solutions that can be used on each gate project. Ironcraft are experts in gate hardware, so we are perfectly positioned to recommend the most suitable products for your gate. We can also supply a huge range of AES intercom systems.

Gate Automation

The Standard range is reinforced for gate automation and automation shoes can be supplied for underground automation. We can also provide gate automation systems suitable for each project.

Fencing

Does your project require matching or additional aluminium fencing or infills? we can help provide a complete solution.

Standard RAL Colours

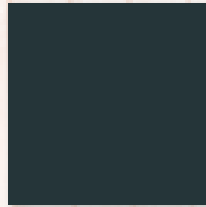

Below is a list of the standard RAL colours in the Edge range. Each design can be manufactured in a non-standard RAL colour and a selection of woodgrain finishes at an additional cost which can be seen above in the downloads section.
